

These sketches show the main screens and functions of my organization app. The three sketches display the home screen, calendar view, and task creation page. There is a navigation bar at the bottom of the screen that allows the user to switch between the 3 screens, there are also buttons for Settings and Profile at the top. The **Home** screen displays upcoming tasks and events on a simple list. There is also a checklist section for smaller daily tasks like studying or cooking. The **Calendar** view allows users to see upcoming deadlines, class schedules, events, and reminders. You can scroll through the dates horizontally or through the times vertically. The tasks are shown with the blocks/tabs that appear on the timeline. The tab has a simple name but can be clicked to view more details. The **Task** creation page lets the user add assignments with a title, date, and description. There is a save button for when you are done.
